Offering the ultimate in HD performance at a real world price, the High Speed with Ethernet HDMI cable range features superior 99.999% oxygen free quality copper and durable moulded HDMI plugs ideal for hard-wearing installations where reliability is essential. Compatible with the full range of HDMI v2.0 specifications, including 4K, full 1080p and deep colour resolutions, 3D and Ethernet and Audio Return Channel (ARC), the High Speed with Ethernet HDMI cable range is available in lengths of 1m, 2m, 3m, 5m and 7m. For longer distances, we also offer the same cable at standard speed over 10m and 15m.

For installations where space is a premium, such as wall-mounted flat-screen TV's, our latest Ultra Slim HDMI cable range offers the same high speed performance in a far more discrete package. Sporting the same specification, compatibility, and reliability as the High Speed with Ethernet HDMI cable range, Ultra Slim HDMI cable cables are available in 0.5m, 1m, 1.5m, 2m and 3m lengths.

Our new Flexi-Form HDMI cable range features an innovative construction that allows them to be manipulated into any desired shape that will then be retained for the duration of the install. Flexi-Form HDMI cables are manufactured from 99.999% oxygen free copper and are compatible with 3D, full 1080P and deep colour resolutions. Ideal for the custom installer looking for a neat solution when cable dressing rack-mounted HDMI devices, they are available in short lengths of 0.3m, 0.5m and 0.75m.
